This technique is born in South America (Colombia, Brasil) about one hundred years ago.
You can do cards, frames, bookmarks, wall decoration or any other thing that your fantasy can imagine.

The technique, not so difficult, requires some tool to give shape and depth to the pattern and other tools to complete the job with perforations that makes your creation like a lace and then... a lot of patience.
Already well known in many countries like Australia, Japan, USA, UK and more, it is arrived also in Italy.
I want to thank Elisabetta and Guido, of "La Luna nel Pozzo", that let me know this technique and gave me the opportunity to become a Registered Teacher, so that now I can teach this marvellous technique.
